Subject: AB Svensk Exportkredit Index-Linked Notes

Information on the Notes

AB Svensk Exportkredit (the “Issuer”) has issued Accelerated Return Notes (“Notes”) linked to the S&P 500 Index (the “Index”). The Notes were priced at \$10 each and mature on October 2, 2009.

As more fully set forth in the Prospectus Supplement, each \$10 principal amount of the Notes will be deemed a “Unit” for purposes of trading and transfer. There will be no payments or redemptions prior to the maturity date.

The Notes provide full exposure to any downside movement in the Index and triple exposure to any upside movement in the Index, subject to a maximum payment at maturity of \$11.785 per unit.

At maturity, investors will receive:

- If the Ending Value is less than or equal to the Starting Value:

$$\$10 \times (\text{Ending Value} / \text{Starting Value})$$
- If the Ending Value is greater than the Starting Value:

$$\$10 + [\$30 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value})]$$

Subject to a maximum total payment at maturity of \$11.785 per unit.

The Starting Value for the Index equals: 1284.26. The Ending Value will be determined near the maturity date.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time

remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Trading in the Notes on ISE is on a UTP basis and is subject to ISE equity trading rules. The Notes will trade from 9:00 a.m. until 4:00 p.m. Eastern Time. Equity Electronic Access Members ("Equity EAMs") trading the shares during the Pre-Market Session are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value ("IIV"). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Pre-Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Pre-Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Pre-Market hours may be at a disadvantage to market professionals.

Equity EAMs also should review NASD Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

This Regulatory Information Bulletin is not a statutory Prospectus. Equity EAMs should consult the Trust's Registration Statement, SAI, Prospectus and the Fund's website for relevant information.
